2016 Consumer Satisfaction Survey

The Consumer Satisfaction Survey questions and process continue to comply with regional guidelines for implementation. The entire Upper Peninsula utilizes the same survey and process.

The overall consumer satisfaction rate in fiscal year 2016 was at **95.6%**. This is the percentage of all responses rated “agree” or “strongly agree”. This year’s satisfaction rate was a slight decrease from last years at **96.6%**.

In January, 2015, the region added 7 questions about recovery. Those results are tabulated as well.

Survey responses were analyzed in aggregate, by each question, by county, and consumer demographics.

Of the **808** questionnaires mailed to consumers during the 2016 fiscal year, **190** were returned, yielding a response rate of **23.5%**. The percentage of return was a decrease from last year’s **25.5%**.

This year’s survey results are summarized in this report and made available to our board of directors, program supervisors, persons served, advocacy groups and community partners. The survey results and feedback from review of the results are used in program development and improvement.
